How's Mom Benefits

Modern Care Communication. Measurable Time Savings. Better Outcomes.

How's Mom, powered by SafeKeeping, is an automated care communications management platform built for Assisted Living, Skilled Nursing, and Independent Living communities. The platform modernizes how care teams engage families, share real-time updates, and manage communication which creates a better experience for residents, families, and staff.

Designed to Save Nurses Time

By automating routine communication and documentation, How's Mom **saves an average of 125 nursing hours per month (over 1,500 hours annually per facility)**. That's time nurses can redirect back to resident care, not paperwork or phone calls.

How's Mom saves the equivalent workload of a full-time nurse making phone calls each year, eliminating the need to hire and pay that salary, by automating routine outreach to family and supporting care coordination.

Key Benefits

Significant Nursing Time Savings
Automated updates and documentation dramatically reduce manual tasks, freeing clinicians from repetitive phone calls and endless charting.

Automatic Documentation & Compliance Support
Care updates are automatically documented and integrated with your EHR, helping reduce survey tags, support regulatory compliance, and eliminate duplicate charting.

Risk Mitigation & Proactive Alerts
Receive real-time alerts that help identify potential risks early and support timely interventions and process improvements.

How's Mom
Powered by SafeKeeping

Streamlined Care Communications
Centralize all resident and family communication in one platform, no more fragmented messages or constant phone interruptions.

Enhanced Customer Service
Meet and exceed resident and family expectations with timely, transparent, and consistent care communication.

Additional Advantages

- Eliminates the need for frequent phone calls through automated, proactive updates
- Seamless EHR integration reduces manual data entry
- Configurable workflows that fit your community's operations
- Multiple communication channels including **Text, Web, App, and Email**
